DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

- 2. The information disclosure statement filed 7/28/04 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed. It has been placed in the application file, but the information referred to therein has not been considered.
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Shimo et al [6844067]. Applicants' attention is to Col.3 lines 10-30 teaching the titanium content from 10%-40% of a solid solution of FeTiO₃-Fe₂O₃ used as a black colorant in a toner. Other additives are taught in Col.6 lines 60-65. The use of an X-ray diffraction is taught in Col.6 lines 5-10. A resin combination is taught in Col.7 lines 20-25.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tosaka et al [6969574] in view of Katamoto [5199983] and Aoki et al [20030186155]. Applicants claims are to a toner, image fixing process, image forming process, apparatus and process cartridge all employing the toner of claim 1. Tosaka teaches a black colorant and a resin in a toner composition. The black metal oxide colorant is taught in Col.2 lines 45-55. The fixing unit is taught on page 3 with a fixing roller that becomes in contact with the toner image bearing surface to the level of 1.0mm or less as known by (JP-A) Nos. 2002-82474 and 09-222750. The toner may contain a charge control agent note Col. 4 lines 15-25 and is used in an image forming machine note Col.7 lines 10-15. Tosaka et al fails to teach the polycrystalline solid solution as a black pigment. Katamoto teaches the solid solution black pigment for a developing toner that has the physical properties i.e. x-ray diffraction pattern and (Ti/Fe =20.0 atom %). Aoki et al. teaches an apparatus and image forming method that any conventional colorant may be suitably used [0081]. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the black pigment

Art Unit: 1756

in the toner composition and the toner composition in the well-known image forming method, apparatus and cartridge.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L. Goodrow whose telephone number is 571-272-1384. The examiner can normally be reached on Monday -Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
